Professional Summary

Highly skilled and experienced React Native Developer with 3.6+ years of expertise in developing cutting-edge mobile applications for Android and iOS platforms. Proficient in building scalable solutions using React Native, TypeScript, JavaScript, Redux, and REST APIs. Skilled in project planning, task management, and delivering high-quality mobile solutions from concept to deployment. Experienced in resolving technical issues, implementing AI-powered features, and ensuring alignment with business objectives. Adept at implementing Agile practices, optimizing performance, and driving successful end-to-end project delivery including solo development of complete applications.

Skills

- **Languages & Frameworks:** React Native, TypeScript, JavaScript, Redux
 - **Mobile Development:** Android, iOS, Cross-platform
 - **Backend Integration:** REST APIs, GraphQL, WebSocket
 - **AI/ML Integration:** Posture Detection, Computer Vision
 - **Tools & IDEs:** VSCode, Android Studio, Xcode, Figma
 - **Version Control:** GitHub, GitLab, Bitbucket
 - **Cloud & Services:** Firebase, AWS, Google Cloud
 - **Testing:** Jest, Detox, SonarQube
 - **UI/UX:** Tailwind CSS, Material Design, Responsive Design
 - **DevOps:** CI/CD, Crashlytics
 - **Project Management:** Jira, Agile Methodologies
 - **Other:** Payment Gateway Integration, Maps (Mapbox)
-

Experience

Software Engineer

Space-O Technologies | Ahmedabad, India | 04/2025 to Present

Currently developing an e-commerce mobile app for Athena Flowers, a Saudi-based florist. Working on enhancing an existing project originally built using low-code/no-code platforms. Implementing new

features including natural, dried, and artificial flower arrangements, gift items, same-day delivery, and gift wrapping services. Utilizing Cursor and Claude Code to improve performance and user experience while working on both online ordering and offline store integration.

Associate Software Developer

Elsner Technologies Pvt. Ltd. | Ahmedabad, India | 07/2024 to 01/2025

Worked on existing projects at Builder.ai, focusing on providing seamless user experiences and improving app performance to meet unique client needs. Explored and implemented innovative solutions for React Native applications, pushing the boundaries of innovation in mobile app development.

Software Engineer

Peerbits | Ahmedabad, India | 02/2023 to 05/2024

Successfully developed the Yelowsoft POS project from start to finish as a solo developer, demonstrating strong initiative, problem-solving skills, and effective task prioritization. Implemented complete stock management, order processing, and cart functionality from scratch. Applied expertise in debugging and troubleshooting to identify root causes and implement effective solutions, resulting in improved product stability and ensuring project success.

Software Engineer

Ecosmob Technologies | Ahmedabad, India | 01/2022 to 01/2023

Developed cross-platform applications using React Native framework for both Android and iOS. Designed and implemented screen layouts delivering seamless user experience. Integrated APIs using RESTful architectures ensuring efficient data management. Enhanced React Native applications by adding features and interactions that improved usability and increased user engagement.

Projects

Athena Flowers | 05/2025 - 08/2025

<https://play.google.com/store/apps/details?id=com.athena.driver>

Saudi-based florist e-commerce app featuring natural, dried, and artificial flower arrangements. Implemented same-day delivery, gift wrapping services, and integrated online/offline store operations.

Xtraplayer | 12/2024 - 01/2025

Live cricket scoring application with real-time score tracking and WebSocket integration for live updates. Implemented comprehensive extras management (wides, no-balls, byes, leg-byes) with intuitive UI/UX. Integrated Score Card and Summary updates using WebSocket technology for seamless real-time data synchronization.

Myne | 10/2024 - 11/2024

<https://joinmyne.com/>

Financial super-app integrating bank accounts, crypto wallets, and stock exchanges. Developed real-time net worth tracking and portfolio management features. Enabled estate planning features with access to wealth planners for drafting wills and trusts.

Yelowsoft POS | 06/2023 - 09/2023

<https://play.google.com/store/apps/details?id=com.yelowsoft.pos>

Solo-developed point-of-sale system for food industry businesses. Implemented complete stock inventory management, order creation and management, and cart handling. Designed user-friendly solution benefiting both businesses and customers.

Yelowsoft User & Driver | 02/2023 - 05/2024

<https://play.google.com/store/apps/details?id=com.yelowsoft.user>

<https://play.google.com/store/apps/details?id=com.yelowsoft.driver>

Food delivery and taxi booking applications. Resolved critical bugs and implemented new features. Streamlined driver-passenger communication and payment processing.

Secure2Go | 08/2024 - 11/2024

<https://play.google.com/store/apps/details?id=nl.secure2go.addressregapp>

Safety application for workers in hazardous environments. Implemented personal alarm system with automatic "man-down" detection ensuring worker safety in challenging environments.

PolEasy | 03/2022 - 01/2023

<https://www.mypoleasy.com/>

Insurance service mobile app streamlining insurance processes. Designed UI screens, integrated REST APIs, and implemented core functionality including policy management, quote generation, and claims handling.

Education

Bachelor of Engineering (BE): Computer Engineering | 05/2022

Gujarat Technological University

CGPA: 7.63

Certifications

HackerRank Certified JavaScript - 2024

HackerRank
Demonstrated proficiency in JavaScript programming, algorithms, and problem-solving skills through comprehensive assessment.

Cutshort Certified React Native - 2024

Cutshort
Validated expertise in React Native development, mobile app architecture, and cross-platform development best practices.

Technical Expertise

- Frontend:** React Native, TypeScript, JavaScript, Redux, Context API, React Navigation
 - Backend Integration:** REST APIs, GraphQL, WebSocket, Firebase
 - UI/UX:** Figma, Tailwind CSS, Material Design, Responsive Design
 - Testing & Quality:** Jest, Detox, SonarQube, Crashlytics
 - DevOps:** CI/CD, GitHub Actions, Bitbucket Pipelines
 - Project Management:** Jira, Agile/Scrum, Sprint Planning
 - Specialized Skills:** Payment Gateway Integration, Real-time Data Sync, Offline-First Architecture
-
