SUMMARY

Experienced React Native developer with 2.6 years of expertise in building scalable mobile applications. I graduated in Computer Engineering from Gujarat Technology University with a CGPA of 7.63. Experienced in developing with React Native, TypeScript, JavaScript, Redux, REST APIs, and GitHub. I've worked on 7 live projects, one of which I developed solo, from scratch. Here's a quick summary:

Pol Easy: It's an insurance service app. I worked on designing the screens, integrating APIs, and making the app functional.

Yelowsoft POS: I solo developed this project for the food industry. I handled everything, including stock management, order processing, and cart features.

Yelowsoft User & Driver: These are food delivery and taxi booking apps. My role was to fix bugs and add new features.

Secure2Go: This was a safety app for workers in dangerous environments. I was part of the team working on it.

Myne: It's a financial app that combines bank accounts, crypto wallets, and stock exchanges with real-time net worth tracking.

Xtraplayer: I'm working on a cricket scoring app. It tracks real-time scores, manages extras like wides and no-balls, and shows live updates with WebSocket technology. I'm focused on making the app easy to use and ensuring it runs smoothly.

Right now, I'm working at Builder.ai, where I'm learning and applying new ideas to build better React Native apps.

EXPERIENCE

Associate Software Developer

Elsner Technologies Pvt. Ltd.   July 2024 - January 2025

- I'm currently working on existing projects at Builder.ai, where I use React Native to create dynamic and scalable mobile applications. My focus is on providing seamless user experiences and improving app performance to meet the unique needs of each client. I'm excited to be part of a team that constantly pushes the boundaries of innovation in mobile app development.

Software Engineer

Peerbits   February 2023 - May 2024

- I successfully developed the Yelowsoft POS project from start to finish, demonstrating strong initiative, problem solving skills, and effective task prioritization to meet deadlines. My expertise in debugging and troubleshooting allowed me to identify the root causes of issues and implement effective solutions, resulting in improved product stability. With a detail oriented and analytical approach, I consistently uncovered hidden challenges and proposed innovative solutions, driving continuous improvements and ensuring the project's success.

Software Engineer

Ecosmob Technologies   June 2022 - January 2023

- Developed crossplatform applications using the React Native framework for both Android and iOS, with expertise in designing and implementing screen layouts to deliver a seamless user experience. Experienced in integrating APIs using RESTful architectures to ensure efficient data management and communication. Proficient in enhancing React Native applications by adding features and interactions that improve usability and increase user engagement.

PROJECTS

Xtraplayer

www.xtraplayer.com/ • December 2024 - January 2025

- Currently working on a Live Scoring mobile application designed to simplify cricket score management in real-time. The app features an intuitive interface for scoring, including options for runs, extras (WD, NB, BYE, LB), and quick undo actions, ensuring accuracy and efficiency. Additionally, the app integrates Score Card and Summary updates using WebSocket technology to provide seamless real-time data synchronization and updates. My role involves implementing smooth user interactions, real-time data handling, and optimizing the user experience to meet the needs of cricket enthusiasts and scorers.

MYNE

joinmyne.com/ • October 2024 - November 2024

- I contributed to the development of Myne, a platform designed to enhance financial well-being by helping users track, manage, expand, and safeguard their assets. The platform integrates bank accounts, cryptocurrency wallets, and stock exchanges, providing a real-time view of net worth and expenditures. My work also involved enabling features for estate planning, offering access to wealth planners for drafting wills and trusts, all within an intuitive, user-friendly app interface.

Secure2Go

play.google.com/store/apps/details?id=nl.secure2go.addressregapp&hl=en_US&pli=1 • August 2024 - November 2024

- Secure2Go offers a personal alarm system designed for workers in dangerous situations, such as aggression or accidents, enabling help to be summoned with the press of a button or automatically through "man-down" detection. The system ensures users are never left unprotected during vulnerable moments, enhancing their safety and providing a sense of security, particularly in challenging environments.

Yelowsoft

play.google.com/store/apps/details?id=com.yelowsoft.user&hl=en_US • February 2023 - May 2024

- Yelowsoft offers both car booking and food delivery services. For reliable and affordable rides, Yelowsoft provides real-time updates from booking to completion, ensuring a smooth and convenient journey. In addition, Yelowsoft's food delivery service delivers a seamless and user-friendly experience,

allowing users to order a wide range of cuisines from the comfort of their homes or offices. With Yelowsoft, users have everything they need for convenient transportation and delicious food delivery, all within one app.

Yelowsoft Driver
play.google.com/store/apps/details?id=com.yelowsoft.driver&hl=en • February 2023 - May 2024
• Yelowsoft Driver is designed to empower ride-hailing drivers by streamlining communication with passengers, providing accurate navigation, and facilitating seamless payment processing. It also offers valuable tools and data insights, helping drivers maximize their earnings while delivering exceptional service. The app ensures a smooth and efficient ride-hailing experience for both drivers and passengers.

Yelowsoft POS
play.google.com/store/apps/details?id=com.yelowsoft.pos&hl=en_US • June 2023 - September 2023
• Yelowsoft POS (Point of Sale) is tailored for food-related businesses such as restaurants, cafes, food trucks, and fast-food outlets. It offers key features like stock inventory management, order creation and management, and cart handling, providing a user-friendly solution that benefits both businesses and their customers.

PolEasy
www.mypoleasy.com/get-started/policyholders-first-time-buyers/ • September 2022 - January 2023
• PolEasy is a mobile app designed to streamline insurance processes, enhancing customer experience and improving efficiency for insurance companies, agents, and policyholders. It offers features such as policy management, quote generation, and claims handling, all accessible via a personalized dashboard. PolEasy aims to revolutionize the insurance industry by providing a user-friendly and efficient platform for all stakeholders.
